

# Connect Computer Club

## Information Sheet

### What is it?

Connect Computer Club is a community based I.T. club which was set up to provide training in computers for people who may not be able to access computer training from other training institutes or centres for various reasons. The Connect Computer Club was set up in 2002. It is run in partnership by the Society of St. Vincent De Paul and the Naas Child and Family Project to meet the needs of people in the local community with an interest in computer training and personal development. The atmosphere is informal and friendly, with an emphasis on each person learning at their own pace. This is a service which is provided free to the community.

### When and Where?

The classes take place in St. Ita's Hall. This hall is located in St. Ita's Estate on the New-bridge Road (opposite Harbour Hotel), Naas, Co. Kildare.

The classes will be planned in accordance to the need of the participants regarding mornings or evenings. Some classes we hope to run are: Beginners, Internet & Email and Fetac 3 & 4 which will be run in partnership with the VEC.

It would be helpful for us when forming classes, if you would complete the enclosed questionnaire to let us know what classes would suit you best.
